

ASMA YASEEN

AI & Full-Stack Developer | Agentic AI Specialist

Karachi, Pakistan | asmayaseen9960@gmail.com | 0335-3047335
github.com/Asmayaseen | linkedin.com/in/asma-yaseen-dev

PROFESSIONAL SUMMARY

Innovative AI & Full-Stack Developer with hands-on experience building agentic AI systems, context engineering workflows, and scalable web platforms using Next.js and Python. Completed the full Agentic AI curriculum trilogy (Loop, Harness, and Graph Engineering) through Panaversity/GIAIC, shipping 27+ real agent projects with Claude Code. Experienced Technical Coordinator with a strong background in mentorship, hackathon management, and cloud-native technologies including Docker and Kubernetes.

TECHNICAL SKILLS

Agentic AI: Loop Engineering, Harness Engineering, Graph Engineering, Claude Code, MCP (Model Context Protocol), Context Engineering, Prompt Engineering, AI Chatbots, Automation Workflows

Frontend: Next.js, React, TypeScript, Tailwind CSS, Responsive UI Design

Backend & Database: Python, Node.js, FastAPI, REST APIs, Sanity CMS, MongoDB, SQLite

Cloud & DevOps: Docker, Kubernetes (Minikube), CI/CD Fundamentals, Git, GitHub Actions, Vercel Deployment

Tools & Integrations: Git, GitHub, Clerk Authentication, Stripe Payments, Figma

SELECTED PROJECTS

github.com/Asmayaseen — 75+ repositories

Agentic AI Curriculum — Loop, Harness & Graph Engineering | *Claude Code, Python, Git*

- Completed 27+ hands-on agent-engineering projects across three full courses: watch loops, maker-checker patterns, scheduled loops, GitHub Actions PR review agents, deny-rule hooks, prompt-injection fencing, and a capstone knowledge-graph system with a grounded verifier.
- Built entirely locally with Claude Code, version-controlled and pushed to GitHub across three dedicated repositories.

Physical AI & Humanoid Robotics — Interactive Textbook | *Python*

- Developed an interactive textbook platform covering Physical AI and humanoid robotics concepts as a hackathon submission.

AI Employee Vault | *Python*

- Built an AI-powered digital employee/agent system prototype for automating structured task workflows.

CRM – Digital FTE (Hackathon 5) | *Python*

- Designed a CRM system architected around a Digital Full-Time Employee (FTE) agent model for the Panaversity hackathon series.

AI-Enabled E-Commerce Platform | *Next.js, Sanity CMS, Stripe, Clerk*

- Architected a dynamic marketplace with scalable content management, secure Stripe payments, and Clerk authentication; optimized frontend performance and responsiveness.

Bilingual AI Chatbot | *Python, NLP, Automation*

- Engineered a bilingual (Urdu & English) AI chatbot using structured prompting, with automated task management and high-accuracy bilingual query handling.

LEADERSHIP EXPERIENCE

Coordinator — GIAIC (Governor's Initiative for AI, Web3 & Metaverse)

Karachi, Pakistan | 2024 – Present

- Lead technical mentorship sessions, guiding students through AI, Agentic AI, DevOps, and Full-Stack development coursework and assignments.
- Organize and manage hackathons, fostering a collaborative learning environment for emerging tech talent.
- Facilitate workshops on cloud computing, agentic AI, and web technologies to bridge theory and practice.

EDUCATION

Advanced Training in Agentic AI, Cloud Computing & Web Development — GIAIC

Karachi, Pakistan | 2024 – Present

Bachelor of Arts (B.A.)

Karachi, Pakistan | Graduated 2004

KEY COMPETENCIES

- Problem Solving — Strong analytical thinking applied to complex debugging and architectural challenges
- Communication — Clear technical documentation and mentorship capabilities
- Collaboration — Experienced in agile team environments and project management
- Adaptability — Rapid learner of emerging technologies and frameworks
